

How To Report Hearing Screen Results on the Florida Newborn Screening Metabolic Specimen Collection Card (formerly PKU)

HEARING SCREENING		LEFT EAR	RIGHT EAR
<input type="text" value="M"/> <input type="text" value="M"/> <input type="text" value="D"/> <input type="text" value="D"/> <input type="text" value="Y"/> <input type="text" value="Y"/> DATE		<input type="radio"/> PASS <input type="radio"/> FAIL <input type="radio"/> OAE <input type="radio"/> ABR	<input type="radio"/> PASS <input type="radio"/> FAIL <input type="radio"/> OAE <input type="radio"/> ABR
HEARING RISK STATUS:		NOT SCREENED BEFORE DISCHARGE REASON: (Select one)	
<input type="radio"/> NICU >5 DAYS <input type="radio"/> ECMO <input type="radio"/> PPHN <input type="radio"/> FAMILY HISTORY <input type="radio"/> CMV <input type="radio"/> BIRTH WEIGHT <1500 GRAMS <input type="radio"/> EXCHANGE TRANSFUSION FOR HYPERBILIRUBINEMIA		<input type="radio"/> EXPIRED <input type="radio"/> MISSED <input type="radio"/> REFUSED <input type="radio"/> EAR RELATED BIRTH DEFECT <input type="radio"/> FACILITY TRANSFER <input type="radio"/> PROLONGED NICU STAY <input type="radio"/> MEDICALLY FRAGILE	

Hearing Screening:

1. Enter the date of the final hearing screen performed inpatient.
2. Darken the circle for final hearing screen results for left and right ears
 - o In case of ear abnormality, darken FAIL (baby needs further testing/an audiology referral)
3. Darken the circle for the method used, either ABR or OAE
 - o Do not handwrite hearing results/method on the card

Hearing Risk Status: Darken ALL that apply:

1. NICU > 5 days when baby received care in neonatal intensive care unit greater than 5 days.
2. ECMO when baby has a condition that required use of extracorporeal membrane oxygenation.
3. PPHN when baby has persistent pulmonary hypertension associated with mechanical ventilation.
4. Family history when baby has a parent, grandparent, sibling, aunt, uncle, first cousin with permanent childhood hearing loss.
5. Birth Weight when baby weighed < 1500 grams at birth
6. Exchange transfusion for hyperbilirubinemia when the patient had a transfusion to treat hyperbilirubinemia.

Not Screened Before Discharge Reason:

1. Darken the circle to indicate the reason a hearing screening was not performed before discharge using the following definitions:
 - a. Expired: Baby passed away
 - b. Missed: Hearing screen was not completed while inpatient before discharge
 - c. Refused: Parent or legal guardian refused hearing screen inpatient
 - d. Prolonged NICU Stay: When baby receives care in the NICU greater than 5 days
 - o Once baby meets criteria established by hospital or medical provider, a hearing screen should be performed and reported
 - e. Ear Related Birth Defect: Hearing screen cannot be performed due to ear abnormality
 - f. Facility Transfer: Baby transferred to another hospital before completing a hearing screen
 - g. Medically Fragile: Baby with a medical condition that requires equipment or procedures to sustain life, e.g., ventilator dependent.
